Accu-Lube Synthetic II

NEW Water-Based Minimum Quantity Stamping Lubricant

Glenview, IL – February 26, 2010 – Accu-Lube announces an economical minimum quantity metalworking lubricant with non-chlorinated extreme pressure and boundary lubrication additives that is specially designed to meet the needs for stamping applications. Synthetic II is formulated to produce high quality parts in moderate-duty operations with ferrous and nonferrous metals. It provides a lot of lubricity, excellent corrosion protection, and is easy to clean.

Accu-Lube Synthetic II is an environmentally-safe lubricant that can be used in a wide range of metalworking and forming applications. The high lubricity qualities of this product perform extremely well in difficult operations where a lot of friction is generated. It helps to improve die life and reduces scrap to save time and money.

Accu-Lube Synthetic II is available in 1 gallon and 55 gallons containers.

ITW ROCOL North America designs and manufactures a full line of lubricants and cutting fluids for the metalworking industry including the Accu-Lube product line of environmentally-safe lubricants and equipment for minimum quantity lubrication.
