

Rustlick™

BENEFITS of Using a DRUM MIXER

The fastest, easiest, and most accurate way to mix your Rustlick coolant concentrate with water is with the Rustlick Drum Mixer.

The sturdy, corrosion-resistant design of Rustlick's Drum Mixer offers a significant advancement over traditional Venturi-type drum mixers. Use our Drum Mixer to dilute and mix your Rustlick coolant concentrate with the proper amount of water to create the perfect concentration for your operations. To make things even easier the Rustlick Drum Mixer comes with a series of color-coded inserts that allow you to designate the specific dilution ratio, each time, every time.

BENEFITS

- ✓ Ensures proper coolant mixture every time
- ✓ Eliminates concerns about mixtures being too concentrated or too dilute
- ✓ Takes the guess work out of the mixing process
- ✓ Eliminates messy, expensive coolant spills
- ✓ Saves you 10 to 20% in the amount of coolant concentrate you use
